## Canning Estuary and Lower Canning River - Water Quality Profiles - 25 March 2025

Department of **Biodiversity**, Conservation and Attractions Biodiversity and Conservation Science We're working for Western Australia.

Date: 25 March 2025

<u>Weather & tide conditions</u>: Conditions were clear with a variable breeze of up to 3.5 knots. The predicted tides at Barrack St were 0.62 m at 5:30 am (low tide) and 1.16 m at 8:13 pm (high tide). Perth recorded no rainfall in the week prior to sampling (Bureau of Meteorology).

<u>Oxygenation</u>: The Bacon St and Nicholson Rd oxygenation plants were both triggered to provide oxygen in the 24 hours prior to sampling.

<u>Canning Estuary (SCB2 to CASMID)</u>: The Canning Estuary was hypersaline at SCB2, saline at SAL and RIV and brackish over saline at CASMID. Waters were oxygenated or well oxygenated, except for bottom waters at CASMID which were hypoxic. Chlorophyll fluorescence was moderate in surface waters at CASMID. Water temperatures ranged from 24.8 to 27.5 °C at the time of sampling.

*Lower Canning River (KEN to ELL)*: The Lower Canning River was fresh. Waters were oxygenated or well oxygenated, except for bottom waters at PAC which were low in oxygen. Chlorophyll fluorescence was moderate in surface waters at NICIN. Water temperatures ranged from 22.1 to 25.4 °C at the time of sampling.

NB: Profile plots are visual interpolations of measured parameters only. Detailed data are available at wir.water.wa.gov.au.

**Oxygenation Plant Operational Status:** 

- Operating for part or all of the 24 hours prior to sampling
- Operable but not triggered to operate in the 24 hours prior to sampling
- Inoperable for part or all of the 24 hours prior to sampling

## Definitions:

 $\begin{array}{l} \underline{Salinity} - fresh < 5, \ brackish 5-25, \ saline 25-35, \ hypersaline >35 \\ \underline{Dissolved \ oxygen} - \ well \ oxygenated >6 \ mg \ L^1, \ oxygenated >4-6 \ mg \ L^1, \ low \ oxygen >2-4 \ mg \ L^1, \ hypoxic \ 0.5-2 \ mg \ L^1, \ anoxic < 0.5 \ mg \ L^1 \\ \underline{Chlorophyll \ fluorescence} (low \ flow): \ low < 50 \ \mug \ L^1, \ moderate \ 50-150 \ \mug \ L^1, \ high \ 150-400 \ \mug \ L^1, \ extreme > 400 \ \mug \ L^1 \end{array}$
